Deprecated Use [GeminiChatRequest\(GeminiModelId, bool\)](#) as this constructor is only for the deprecated [GeminiManager.Compute<TRequest, TResponse>\(TRequest, GeminiManager.RequestEndPoint, string, bool\)](#) method.

6.4.3 Member Data Documentation**6.4.3.1 CachedContent**

```
string Uralstech.UGemini.Chat.GeminiChatRequest.CachedContent = null
```

The name of the cached content used as context to serve the prediction. Format: cachedContents/{cachedContent}.

Note: only used in explicit caching, where users can have control over caching (e.g. what content to cache) and enjoy guaranteed cost savings.

Only available in the beta API.

6.4.3.2 Contents

```
GeminiContent [] Uralstech.UGemini.Chat.GeminiChatRequest.Contents
```

The content of the current conversation with the model.

For single-turn queries, this is a single instance. For multi-turn queries, this is a repeated field that contains conversation history + latest request.

6.4.3.3 SafetySettings

```
GeminiSafetySettings [] Uralstech.UGemini.Chat.GeminiChatRequest.SafetySettings = null
```

A list of unique [GeminiSafetySettings](#) instances for blocking unsafe content.

This will be enforced on [Contents](#) and [GeminiChatResponse.Candidates](#).

There should not be more than one setting for each [GeminiSafetyHarmCategory](#) type. The API will block any contents and responses that fail to meet the thresholds set by these settings. This list overrides the default settings for each [GeminiSafetyHarmCategory](#) specified in the [SafetySettings](#). If there is no [GeminiSafetySettings](#) for a given [GeminiSafetyHarmCategory](#) provided in the list, the API will use the default safety setting for that category. Harm categories [GeminiSafetyHarmCategory.HateSpeech](#), [GeminiSafetyHarmCategory.SexuallyExplicit](#), [GeminiSafetyHarmCategory.DangerousContent](#) and [GeminiSafetyHarmCategory.Harassment](#) are supported.

6.4.3.4 SystemInstruction

`GeminiContent` Uralstech.UGemini.Chat.GeminiChatRequest.SystemInstruction = null

Developer set system instruction. Currently, text only.

Only available in the beta API.

6.4.3.5 ToolConfig

`GeminiToolConfiguration` Uralstech.UGemini.Chat.GeminiChatRequest.ToolConfig = null

Tool configuration for any Tool specified in the request.

Only available in the beta API.

6.4.3.6 Tools

`GeminiTool` [] Uralstech.UGemini.Chat.GeminiChatRequest.Tools = null

A list of [Tools](#) the model may use to generate the next response.

A Tool is a piece of code that enables the system to interact with external systems to perform an action, or set of actions, outside of knowledge and scope of the model. The only supported tool is currently Function.

Only available in the beta API.

6.26.1 Detailed Description

Configuration options for model generation and outputs. Not all parameters may be configurable for every model.

6.26.2 Member Data Documentation

6.26.2.1 CandidateCount

```
int Uralstech.UGemini.Chat.GeminiGenerationConfiguration.CandidateCount = 1
```

Number of generated responses to return.

Currently, this value can only be set to 1. If unset, this will default to 1.

6.26.2.2 ResponseMimeType

```
GeminiResponseType Uralstech.UGemini.Chat.GeminiGenerationConfiguration.ResponseMimeType =  
GeminiResponseType.Unspecified
```

Output response type of the generated candidate text.

Only available in the beta API.

6.26.2.3 ResponseSchema

```
GeminiSchema Uralstech.UGemini.Chat.GeminiGenerationConfiguration.ResponseSchema = null
```

Output response schema of the generated candidate text when response mime type can have schema.

If set, a compatible [GeminiResponseType](#) must also be set. Compatible types: [GeminiResponseType.Json](#) ↔ [Schema](#) for JSON response.

Only available in the beta API.

6.26.2.4 TopK

```
int Uralstech.UGemini.Chat.GeminiGenerationConfiguration.TopK = -1
```

The maximum number of tokens to consider when sampling.

[Models](#) use nucleus sampling or combined Top-k and nucleus sampling. Top-k sampling considers the set of topK most probable tokens. [Models](#) running with nucleus sampling don't allow topK setting.

6.26.2.5 TopP

```
float Uralstech.UGemini.Chat.GeminiGenerationConfiguration.TopP = -1f
```

The maximum cumulative probability of tokens to consider when sampling.

The model uses combined Top-k and nucleus sampling.

Tokens are sorted based on their assigned probabilities so that only the most likely tokens are considered. Top-k sampling directly limits the maximum number of tokens to consider, while Nucleus sampling limits number of tokens based on the cumulative probability.

6.30.2.3 Temperature

```
float Uralstech.UGemini.Models.GeminiModel.Temperature
```

Controls the randomness of the output.

Values can range over [0.0,2.0], inclusive. A higher value will produce responses that are more varied, while a value closer to

0.0 will typically result in less surprising responses from the model. This value specifies default to be used by the backend while making the call to the model.

6.30.2.5 TopP

```
float Uralstech.UGemini.Models.GeminiModel.TopP
